

Environmental policy

EMVE Sweden AB works with develop machines and process lines that streamline the processing chain from producer to customer. Active environmental work is a matter of course in our daily operations.

- When purchasing plastic parts, steel, motors, machines, etc., we must work with suppliers and partners who have a high level of environmental awareness.
- We will actively work to minimize our consumption of fossil fuels linked to transport by planning and coordinating these and choosing vehicles that have a high environmental profile.
- We will work with environmentally adapted waste management within the company.
- We will economize on resources and use renewable energy in our operations to the greatest extent possible.
- We will strive towards a circular economy where we minimize the environmental impact of our operations and our products by enabling the reuse of our products and adapting our product solutions to the customer's wishes.
- We will prevent pollution by maintaining and service machines, vehicles and equipment as well as handling chemicals in a safe manner to protect our common environment and other commitments.
- We will comply with internal and external requirements, applicable legislation and other binding requirements.
- We will work long-term with our improvement work by developing our environmental management system and our operations to achieve a higher environmental performance.

For us, the small everyday environmental measures are at least as important as major changes. The sum of all measures shall lead EMVE Sweden AB's environmental work forward and mean that continuous improvements are achieved.
